Modern Bamboo is a brand under CxF Design Center Corporation.

CxF Design Center Corporation was established in 2013. We supply customized modular kitchen, wardrobe cabinets, window blinds, solid bamboo flooring and other bamboo products.

Our prices are highly competitive as we supply to various residential and commercial condominium projects.
We supply variety of solid bamboo products to the Philippine market. Bamboo is widely used across the globe due to its durability, elegance and sustainability. It is considered a better alternative to hardwood.
WHY CHOOSE BAMBOO FLOORING

Eco-Friendly
Bamboo is a highly renewable resource which grows and matures in 3-5 years. The natural surface of bamboo has several properties similar to hardwood flooring, but actually created from a type of grass.

Water-Resistant
More resistant to water damage, stains, and warping than hardwood, engineered and laminated flooring.

Easy Maintenance
Relatively easy to keep it clean and free from any debris. Can be refinished by sanding it then reapplying a finishing coat to give it a fresh new look.

Healthy
Good prevention for rheumatoid arthritis due to low thermal conductivity. It is hypoallergenic. Eliminates fatigue due to elasticity. Good for vision since it absorbs ultraviolet light.

Natural
Bamboo is a great natural flooring alternative to hardwood.

Pet-Friendly
Bamboo flooring is a great option for pet owners, its natural hardness makes it more stain and scratch resistant than other floorings.

Water-Resistant
More resistant to water damage, stains, and warping than hardwood, engineered and laminated flooring.
WHY CHOOSE BAMBOO FLOORING

Durable
It is a naturally composite material. High strength to weight ratio. Solid bamboo flooring is harder and denser than traditional hardwoods. One of the highest rated floors on the Janka Hardness Scale, the universally accepted test of hardness in wood.

Cost Effective
Solid bamboo flooring is more affordable than traditional solid hardwood.

WHY CHOOSE MODERN BAMBOO

Quality Raw Materials
We use 5-6 year old matured bamboo which is most compact, most durable and most suited for bamboo flooring.

E1 Standard
We use 8 coats of odorless, healthy and scratch resistant German Treffert paint.
The formaldehyde component of our bamboo flooring is up to E1 European Standard.

Advanced Technology
Our partner manufacturing plant has over 20 years of experience using the most advanced technology in manufacturing.

High-tech Locking & PE Foam
Click locking system for easy installation, removal and repair. It is more high-tech, stable, and convenient compared to the normal T&G locking system. We use PE foam with special HDPE layer.

Termite Treated
Our planks are treated against termites.

Trusted Supplier
Our company has been supplying construction materials since 2010 and is conveniently located along EDSA Pasay.
Item Description

WALNUT BROWN STRANDWOVEN

Dimension: 1850 x 125 x 14mm
Qty/box: 6pcs; 1.39sqm
Finish: Germany Treffert UV Varnish
Brightness: Semi-matte
Milling: Uniclic locking system
Installation: Floating
Item Description

NATURAL YELLOW STRANDWOVEN

Dimension: 1850 x 125 x 14mm
Qty/box: 6pcs; 1.39sqm
Finish: Germany Treffert UV Varnish
Brightness: Semi-matte
Milling: Uniclic locking system
Installation: Floating
Item Description

TEA BROWN STRANDWOVEN

Dimension: 1850 x 125 x 14mm
Qty/box: 6pcs; 1.39sqm
Finish: Germany Treffert UV Varnish
Brightness: Semi-matte
Milling: Uniclic locking system
Installation: Floating
Item Description
PECAN BROWN HORIZONTAL

Dimension: 1020 x 130 x 15mm
Qty/box: 20pcs; 2.65sqm
Finish: General UV Coating
Brightness: Semi-matte
Milling: Small click locking system
Installation: Floating
SOLID BAMBOO FLOORING ACCESSORIES
SOLID BAMBOO FLOORING ACCESSORIES (INDOOR)

**BASEBOARD/WALLBASE**

*Dimension*
- (Walnut Brown): 1850 x 60 x 14mm
- (Natural Yellow): 1850 x 60 x 14mm
- (Pecan Brown): 2000 x 80 x 15mm

A decorative molding that is nailed down to the wall on the top of, it is also to cover the gap of bamboo flooring and wall.

**T-MOLDING**

*Dimension*
- (Walnut Brown): 1850 x 48 x 14mm
- (Natural Yellow): 1850 x 48 x 14mm
- (Pecan Brown): 2000 x 50 x 15mm

Use as transition for two floor of same height, normally in doorways, on the gap of door.

**END PROFILE/THRESHOLD**

*Dimension*
- (Walnut Brown): 1850 x 50 x 24mm
- (Natural Yellow): 1850 x 50 x 24mm
- (Pecan Brown): 2000 x 50 x 24mm

Use as transition for two floor of different height, normally on doorways of going to bathroom, or termination to any other flooring of different height.
**QUARTER ROUND**
**Dimension**
(Walnut Brown): 1850 x 19 x 19mm  
(Natural Yellow): 1850 x 19 x 19mm  
(Pecan Brown): 2000 x 15 x 15mm  

Use along the base of the wall against the baseboard to cover gap between flooring and the wall, can also take the function of baseboard.

**REDUCER**
**Dimension**
(Walnut Brown): 1850 x 48 x 14mm  
(Natural Yellow): 1850 x 48 x 14mm  
(Pecan Brown): 2000 x 50 x 15mm  

Use to smoothly taper the edge of bamboo flooring down onto another surface.

**STAIRNOSING**
**Dimension**
(Walnut Brown): 1850 x 90 x 14mm  
(Natural Yellow): 1850 x 90 x 14mm  
(Pecan Brown): 2000 x 100 x 17mm  

Use on the front edge of a stair step.

TRADITIONAL OUTDOOR FLOORING

MODERN BAMBOO

Discoloration + Decay

Deformation + Not Natural
Modern bamboo is made from natural Moso bamboo, it has a lot of advantages compared to traditional outdoor flooring such as WPC and outdoor wood flooring. Bamboo outdoor decking is the trend and will soon replace WPC as major use for outdoor flooring.

Why Choose Bamboo Flooring?

DURABLE
Solid bamboo flooring is harder and denser than traditional hardwoods. It is second only to vinyl in hardness.

EASY MAINTENANCE
Bamboo flooring is relatively easy to maintain, and it doesn’t demand a lot of upkeep.

HEALTHY
Bamboo flooring is an excellent floor for those who suffer from allergies. It is made from 100% natural material and is hypoallergenic.

NATURAL
Bamboo is a natural plant material that can be sustainably harvested.

WATCH RESISTANCE
Solid bamboo flooring is more resistant to water and moisture than other wood floors.
